Ferry-lifting

It is possible to get a free ferry ride by doing this:

- Stand on the ferry boat with a car and no ticket and wait for the timer to hit 0
- Drive off the boat and immediately on again

If done right, you should now be half-floating with your car on the ferry and get to take a free ride. It's extremely precise and i'm pretty sure i am the first to document this.

Use-cases aren't really that useful since it just saves a tiny amount of money.
